

LAST HOME GAME GOES TO N. H. 8-4

DEFEATS RHODE ISLAND HANDILY SATURDAY

BATES TRIMS OUR TEAM 5-3

Triple Play in Ninth Inning Puts Quietus on N. H. Rally—Broderick, Blatchford and Brackett Play Well.

New Hampshire won the last home game of the season, Saturday, May 29, defeating our old rival, Rhode Island by the score of 8 to 4. Neither side scored until the third, when Rhode Island broke the ice by scoring two runs on two hits, two errors, and a sacrifice.

New Hampshire tied it up in the fifth with two runs and then cinched the game in the seventh with four more. Bissell was the first man up in the seventh and flied to Sirfet. Blatchford reached first on an error by Sirfet, then went to second on an error by Lewis, Irvine going to first on the same play. A passed ball then advanced both runners a base, and a hit by Broderick brought Blatchford home. Humiston then flied out to first, Fernald drew a base on balls, and then Cram found a ball to his liking and placed it along the third base line for two bases. It would easily have been a three base hit, but he hesitated at second and was put out at third. However, in the meantime, three runs had come in.

TWO RUNS FOR R. I.
The visitors made a desperate effort in the eighth to tie the game up but their efforts only resulted in two more runs. To show the visitors that New Hampshire could do the same, Welsh and Brackett added two more runs in the latter half of the eighth. At this point Brackett created a sensation by stealing home on the pitcher's wind-up.

Cram was the star both at bat and in the field, getting a double and a single in four trips to the plate and accepting 13 out of 14 chances. Brackett and Blatchford, as well as both pitchers, played a good game.

TENNIS TOURNAMENT WON BY CONNECTICUT "AGGIES"

New Hampshire Loses by Score of 5 to 1—Steele Only Local Man to Win Match—Other Men Played Close Game.

The tennis representatives of New Hampshire college were defeated by the Connecticut Agricultural College team at Storrs last Saturday by the score of 5 to 1. The tournament was much closer than the score indicates, as all of the New Hampshire men won sets either in the doubles or singles.

Steele was the only New Hampshire man to win his match although all the other men played very close games. Steele played very good tennis, winning chiefly on account of his well-placed shots.

LOCAL MEN LACKED STEADINESS.
In many instances the New Hampshire men outplayed their opponents but they lacked the steady playing which comes from long practice. Connecticut has had a team for five years and has already played four matches this year, with Harvard and Yale second teams, and Trinity and Brown.

Ordway was defeated in a very fast match with Captain Henry who won several sets at Yale. The score was 6-3, 7-5.

Atkins was defeated 3-6, 6-0, 6-1. Fisher won his first set in fine form but lost the next two. The score was 1-6, 8-6, 7-5.

Steele won his match in straight sets, 6-2, 6-3.
The doubles were interesting considering the fact that the New Hampshire teams had never practised together before. Ordway and Steele formed one team, and made their opponents go to the limit to win. The score was 6-3, 4-6, 6-2. Atkins and Fisher were defeated in straight sets, 6-3, 6-4.

COMPANY E RANKS HIGHEST IN GOVERNMENT INSPECTION.

A detailed account of the results of government inspection of the battalion Friday, May 28, will be received shortly after Captain Schindel's report is made to the chief of staff at Washington June 10. The companies were graded in the following order:—E. C. A.

Captain Schindel's comments on the advance guard and patrolling work were favorable.

Government inspection is one of the five factors which determine to which company the colors will be given for the following year. The other four factors are: The intercompany meet, The intercompany rifle match, prize drill, and prize saber drill.

Captain Schindel's inspection work covers the entire Atlantic Coast.

AGRONOMY DEPARTMENT STARTS ANNUAL POTATO EXPERIMENTS.

In the past week the agronomy department has been planting the potatoes for the fertilizer experiments which now have been going on for four years. There are fifty plots designed to show the best combination of fertilizing materials and the proper amount to use in growing potatoes. The tests are being conducted on the Weld farm a mile west of the college, which has been leased for the purpose.

PRESIDENT FAIRCHILD SPEAKS AT LAST CHAPEL CONVOCATION.

In the last chapel exercise of the college year Wednesday afternoon, President E. T. Fairchild urged his hearers to resolve all that they may do to be from this day more industrious, to adopt still higher standards and to consider more seriously life's responsibilities.

For the college, there will be rapid growth he declared in the near future. There will be more students next year than ever before, there will be better living conditions, a better and somewhat larger faculty, and better equipment.

ALUMNUS SUGGESTS SOME REMEDIES

RECOMMENDS ATHLETICS TO PUT N. H. C. ON MAP.

WANTS A FIFTY DOLLAR TAX

L. W. Bennett, '12 Thinks That Good Athletic Coaches Will Develop N. H. as They Have Cornell.

In a recent alumni letter, L. W. Bennett, '12 offers a few suggestions for the benefit of New Hampshire College in general and athletics in particular.

Mr. Bennett points out that for five or six years, almost since the organization of the "Publicity Board," New Hampshire has done a lot of valuable advertising so that the institution is becoming well known. "What will aid most in making the college better known? Simply this—improve athletics."

ATHLETICS STANDING IMPORTANT.
"In any college or university the first thing a student looks at, whether he is an athlete or a "reside" athlete is the "Sports" page. He buys the paper for that one page. Today the boy in high school athletics or out chooses his college not altogether because of its scholarship but because of its standing in athletics."

"The one thing that has put Dartmouth on the map is athletics. Everett (Massachusetts) High school is known from Maine to California because of her football teams. About a month ago at the "Stanley" ("Movies") I saw New Hampshire College mentioned, especially in the winter sports at McGill University. That is the advertising that a college gets by investing in athletics."

"New Hampshire is growing rapidly in numbers and with proper coaching, teams could be put upon the field that would make a much more creditable showing. There is no intent, however, to insinuate that they are not doing well now—because they are doing as well as they can; and if the Alumni knew how hard "Pa" Taylor had "to scrape the barrel" to get a little more money, they would feel that the student body and faculty have a hard row to hoe to carry along this particular department of the college."

ALUMNI DORMANT.

At the present time the Alumni of New Hampshire College are not doing a thing for their Alma Mater to show their appreciation of what they have received."

"The "Dormant Spirit" of New Hampshire is often spoken of. This is due, to a large extent, to the dormant spirit of the alumni. What they need is something to wake them up and then it will be found that the active students are not dormant but merely handicapped. The college spirit at New Hampshire, with her handful of students, is far more than at the University of Pennsylvania, with over 5000 students.

TAX FOR ATHLETICS.

"Here is a suggestion for the remedy. Let every present alumnus be taxed fifty dollars, to be paid in three yearly installments of twenty-five, fifteen and ten dollars, and let every coming graduate, beginning June, 1915, be taxed the same. Then use this entire amount in coaching athletics. Twenty-five dollars may seem a lot to some at first thought, but it is actually about eight cents per day. By doing this little favor they will build up New Hampshire College in every department and at the same time get value returned in that they were graduated from a college that will be known among men as a producer of men. For then they will be anxious to read the "New Hampshire" publications and the matter of obtaining subscriptions will not have to be settled by "Salvation Army," or "pulling teeth" methods. They will feel that they are getting something for their money."

"It must be used judiciously, however. See what "Al" Sharpe has done

ALPHA ALPHA ALPHA GETS NATIONAL CHARTER

Becomes Mu Alpha Chapter of Chi Omega One of the Five Largest Nationals For Women.

The Supreme Governing Council of Chi Omega fraternity has granted a charter to Alpha Alpha Alpha sorority. The new chapter which is to be Mu Alpha chapter of Chi Omega will be installed Friday, June 11, 1915. The local sorority has been in existence for twenty years. It was known as the W. H. A. Society from 1894 to 1911 when it became Alpha Alpha Alpha. Chi Omega is one of the five largest fraternities for women. The installation of Mu Alpha chapter will make an enrollment of thirty-three chapters.

FAREWELL ENTERTAINMENT GIVEN MISS MARIAN EDES GIDDINGS.

Miss Marian Giddings of the Pi Alpha Phi Sorority was entertained by the other members of the sorority at a farewell party on Thursday evening. A very interesting program was enjoyed which comprised vocal solos by Miss Turcotte and Miss Charbonneau and recitations by Miss Giddings. During the evening dainty refreshments consisting of sandwiches, coffee, cakes and ices were served.

Miss Giddings left for her home in Waltham, Saturday.

KIMBALL UNION ACADEMY WINS DEBATE FROM SANBORN SEMINARY.

In Thompson Hall on Friday evening, May 28, Kimball Union Academy defeated Sanborn Seminary in the interscholastic prize debate on the subject "Resolved, That Military and Naval Preparedness Is A Safeguard Against War." Kimball Union, arguing on the affirmative side of the question, completely outclassed the Sanborn team at every stage. The vote of the judges was 2 to 1 in their favor. The prize, a silver cup, was awarded to the winning team by the Hon. Walter M. Parker of Manchester.

The men who represented Kimball Union Academy were Hazen E. Turner, Lester N. Day, Roy G. Metcalf and Herbert H. Barraclough. The Sanborn team was composed of E. Lester Shaw, Stanley G. Judkins, Norris D. Gove and Ralph L. Lovejoy.

The judges of the contest were Prof. Wilman H. Sheldon of Dartmouth, Principal Verne A. Whitman of Laconia High school and Mr. Dwight Hall of Dover.

Music was furnished by the college orchestra.

WOMAN'S LEAGUE HOLDS REGULAR MONTHLY MEETING.

The regular monthly meeting of the Woman's League was held Tuesday afternoon, June 1, in Smith Hall. During the business meeting the president announced that the total profit from the play "Mice and Men" is three hundred and twenty dollars. It was voted to pay the College Orchestra for its services in helping to make the play a success. Mrs. Clarence W. Scott was elected auditor of the League for the coming year.

During the social hour which followed orange sherbet and wafers were served by the hostesses, Mrs. Clarence W. Scott and Mrs. Rubert V. Mitchell.

President Fairchild spoke recently before the Union Pomona Grange at Dunbarton.

Black Box Mystery every Wednesday and Thursday at the Lyric.

for Cornell in the past three years. On the other hand, see the result of "Penn's" two seasons of football under Brooke. Next year Brooke will be "retained simply because he is under a three-year contract—other men will do the coaching."

VERMONT 62 NEW HAMPSHIRE 55

ANNUAL TRACK MEET SHARPLY CONTESTED THROUGHOUT

FIVE RECORDS ESTABLISHED

Blue and White Team in Fine Form—Ward Wins Three Firsts, Breaking Two Records—Two Men Get Letters

Owing to a little hard luck New Hampshire lost the annual track meet with Vermont last Saturday by the close score of 62 to 55.

New Hampshire took the lead at the very first crack of the gun and held it—sometimes by a wide margin—until the next to the last event. A dearth of men was the principal cause of the defeat. New Hampshire captured more firsts than did Vermont but did not have enough men to take seconds and thirds. In some instances only one New Hampshire man was entered in an event, this making free gifts of the rest of the points.

R. W. Smith of Vermont was the high point-getter of the meet capturing three firsts and a third, while Ward of New Hampshire was a close second with three firsts. Ward's performance was the more remarkable as his time was better comparatively, two records being broken by him.

FIVE RECORDS GO
Five New Hampshire records were broken, the two dashes, the half, the shot-put and the hammer-throw. Two men made their letters for the first time Groves and Whittemore, each winning the six points which entitles one to his letters.

The 100-yd. dash was the first event and was won handily by Ward, who clipped 1-5 of a second off of the record held by C. W. Kemp since 1911. Ross had second place cinched up to the last 20 yards when he pulled a tendon, dropping back to third place.

The 880-yd. run was the next event and was one of the prettiest races one could imagine. The race was about even with "Sid" Wentworth trailing his man until the right moment during the last lap, when he sprinted and pulled ahead in the last five yards. Incidentally he clipped 3-5 of a second off of the record.

POLE VAULT
While these two races were going on the pole vault was being hotly contested. The Vermont athlete broke the local institution's record doing 10' 6" but was not able to defeat Brill of New Hampshire who won at 10' 8" which merely equalled his own record made earlier in the season.

In the two hurdles Groves was the only one entered for New Hampshire and although he holds the record for the low hurdles and has equalled the record for the high he was forced to take second place in both events as the time in both instances was faster than his records.

In the mile run Sherry of Vermont proved too fast for Whittemore and took first place. The time was better than the record at our college.

TWO MILE
After running the mile in such fast time, Whittemore found that the two-mile was almost too much for him. However, the plucky little runner fought it out to a finish and won second. The two-mile was really two races in one. While Hayden and Whittemore were racing for first place, Eastman and Shippy were fighting it out for third place. The effects of the all-night's ride on the train plainly showed on the New Hampshire boys in these two gruelling races.

In the shot-put Bugbee had things all his own way, but just to show what he could do he heaved the leaden pill 35' 10 1-2", breaking the record held by the redoubtable "Noah". Brill divided his attention between the pole vault and the shot-put and was able to pull a third in the latter event.

Vermont showed some class in the high jump, having one man who can do

NOTICE.

The next issue of the New Hampshire will be "Commencement Number" and will be published Tuesday of Commencement Week.

EDITORIALS.

JUNIOR-PROM WEEK.

It is approaching the end of the year and we have passed thru most of the social events of the season except the Commencement exercises. It is time now for us to begin to consider some of the questions for next year. One question of importance is the one: Shall we have one house-party or two?

There have been many arguments put forward both for and against the idea of having a social week something after the manner of a "Prom Week;" and it seems, after all the evidence is in, that the Prom week idea is the best one for the conditions existing here. It is, at any rate, certain that the present system is wasteful and unsatisfactory.

In connection with the proposition it has been suggested that omitting the February house-party would not be supporting the Sophomore Hop as it should be; but here is a question: Should there be a Sophomore Hop or should the main social affair of the season be run by the Juniors? It really seems as if the Juniors should do it. If they should, the time would be changed from winter to spring.

We all know that the spring is the most ideal time. House-parties of any size are extremely difficult to manage in the winter when the weather is so uncertain. It is a tax on everyone to think up new forms of entertainment. Some of us have maintained that there should still be two parties even in the face of the arguments against it which have already been stated in print.

However it is time that we should think these things over and decide which is the best system for New Hampshire College to follow, from an economic standpoint as well as from the standpoint of our universal desire to have as much fun as possible with the least trouble to ourselves.

Here is a problem for the Student Council.

THE STUDENT COUNCIL.

Why is it that we do not hear more of the work of the Student Council. There are problems coming up all the time which require settlement and these are mostly left to the student body to settle by a process of evolution. In some of these cases the Student Council could be of great use in getting a speedy and satisfactory adjustment.

In any self-governing body the meetings of the representative elements are of paramount importance in directing policies and the like. Now, we seldom hear anything of our Student

Council's doing much of that sort of work. Why is it?

As far as can be judged by the facts of the case as they appear to an ordinary observer, the Student Council is merely a nominal body having no active influence of any importance. This should not be so because the body is intended to be a council of representative students who as a whole express the ideas and desires of the main body of students. Therefore when there is a meeting there should be something doing of moment.

Give the Council the powers it should have and let it handle some of these affairs which are now simply being adjusted by a process of time.

TENNIS.

Although the team which the Tennis Association sent to Connecticut won only a small percentage of its matches, chiefly owing to lack of practise, it still made a showing. The very fact that a team was sent counts as a start toward something better next year.

This year nothing was done until late spring. Now it seems as if something should be put in motion for next year. A fall tournament or round robin would be an excellent thing to arouse interest and promote team play.

Besides this the Association itself should be thoroughly organized and put in order for efficient work right from the start.

There is a grand opportunity for college advertisement through the medium of intercollegiate tennis, because it is popular with so many different classes of people from the standpoint of participants rather than of spectators. It is a healthy game requiring no great training and having the advantage that it may be played either fast or slow without materially injuring the interest.

It is for the lovers of tennis to put the Association on its feet as a working body so that it may lay plans for a good year in 1916, so that we may extend our influence to a new field of college activities.

Track athletics are evidently looking up. When seven records are broken in one meet it begins to look as if some of them would soon be put where they should make a fairly respectable showing alongside intercollegiate records. Some day we must send a team to the New England Intercollegiate.

The joke about driving Fords on the sidewalk to keep them out of the way of the automobiles does not seem to be a joke any more—at least in Durham. The momentous question now seems to be: Where can we drive them to keep them out of the way of the poor pedestrians?

There was considerable spirit manifested at the Rhode Island game, and it looked good. Keep it up!

"COMMUNICATION."

Alumni Editor

Dear Sir:

In a recent issue of the "New Hampshire" I notice an editorial entitled "What Runs A Team," and I also notice an article from yourself urging all alumni to contribute to the paper. Prompted by those two articles, allow me to pen a few comparisons and sentiments on the subject.

May 12th I attended the New Hampshire-Lowell Textile game, the first that I had attended since graduation in any branch of athletics, and I was surely disappointed at the attendance. No wonder that athletics does not pay.

The two years that I was a student at Durham there was only an enrolment of 250, but at every football, basketball or baseball game there were nearly 250 students in attendance. I tell you we all had some spirit and some love for old New Hampshire in those days, and wanted to see a winning team. We didn't always have it, but we were right behind the team with the spirit and support. I have often heard a member of a team say, "We wouldn't have won that game, but the boys on the side-lines made us go in and score."

Now there is an enrolment of nearly 500 and only about 150 were out to the Lowell baseball game.

I was talking to Bourroughs, '10 a few days ago and he said he believed it was the lack of class spirit. But whatever the cause, your college spirit is rotten. Now if you fellows don't wake up and support the team, your college will lose the advertisement it gets through athletics, in consequence of which the enrolment will not grow as it should, and the institution that made

possible your start in the world will be practically unknown. In a very few years, if all future students follow your policy of sleeping, reading, Dowering, or girling on the days of varsity games, athletics will be a thing of the past because there is no money for it.

I believed in my college days and do now, that it is the duty of every student to attend all varsity games, whether interested in them or not, but just for the sake of the advertisement the college gets and to give the players confidence in the school they are striving to win for. When the commandant of the Military department takes interest enough to postpone a drill on account of a game, there is no reason why the students shouldn't take interest enough to attend.

If this will make one more student attend that would not otherwise, it's purpose will be fulfilled.

Claudian F. Hill, 2-yr. '09.

LAST HOME GAME.

Concluded from page 1.

runs in the fifth and after that were unable to get another runner home.

New Hampshire's runs came in the fifth and eighth. In the fifth Welsh, the first man up, doubled and then scored on a hit by Brackett. Blatchford then connected for two bases which sent Brackett home. In the eighth Broderick opened up by landing on second with a two-bagger and then he scored on another double by Cram.

TRIPLE PLAY IN 9TH.

The feature of the game was a triple play in the ninth. Bissell drew a free ticket to first and went to second on an error by McDonald; Blatchford reached first on a fielder's choice, and then Irvine drove a liner which looked good for a hit through short but McDonald grabbed it and doubled Bissell up at third. Blatchford had already started for second and before he could get back to first the first baseman had received the ball from third, putting him out.

Broderick starred at bat for New Hampshire, getting a double and a single out of two trips to the plate.

DE LAVAL

CREAM SEPARATORS

are used exclusively by
98% of the World's Creameries

TEN YEARS AGO THERE WERE a dozen different makes of creamery or factory separators in use. Today over 98 per cent of the world's creameries use De Laval Separators exclusively.

IT MEANS A DIFFERENCE OF several thousand dollars a year whether a De Laval or some other make of separator is used in a creamery.

EXACTLY THE SAME DIFFERENCES exist, on a smaller scale, in the use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the

creameryman, or test their skim-milk with the Babcock tester, they do not appreciate just what the difference between a good and a poor separator means to them in dollars and cents. NOW IF YOU WERE IN NEED OF legal advice, you would go to a lawyer. If you were sick you would consult a doctor. If you had the toothache, you would call on a dentist. Why? Because these men are all specialists in their line, and you rely upon their judgment and skill.

WHEN IT COMES TO BUYING A separator why not profit by the experience of the creameryman which qualifies him to advise you correctly? He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries and milk dealers use the De Laval exclusively.

THERE CAN BE NO BETTER recommendation for the De Laval than the fact that the men who make the separation of milk a business use the De Laval to the practical exclusion of all other makes of cream separators.

A De Laval Catalog, to be had for the asking, will make plain the many points of superiority of De Laval Cream Separators.

Spring and Summer Clothing

The most important factor in the matter of dress is the FEELING that your clothes are up to date, that they are properly tailored. Style is also a most important element in a spring suit—the Spring Suit is more closely observed than that of any other season.

Adler-Rochester

Suits always look well—they always hold their shape. They combine style, beautiful tailoring, perfect fitting and long wear—that's why they excell. And they are distinct and individual. Today is the day to make your selection—the assortment is now complete.

NEWSY ITEMS OF THE ALUMNI.

HARRY PEACH CORSON '10 TO GET DEGREE OF Ph. D.

L. W. Bennett, '12 Instructor at University of Pennsylvania—L. D. Jessemann, '14 Gets Fellowship Uni. of Missouri.

Harry Peach Corson, B. S., New Hampshire College, 1910, M. S. University of Illinois, 1912 passed his final examination for the degree of Doctor of Philosophy at the University, Tuesday, May 25. From 1910-11, Mr. Corson was assistant in chemistry at Illinois, and from 1911-15 assistant in sanitary chemistry. From 1911-12 he served as chemist for the State Water Survey, University of Illinois, and from 1911-15, as chemist and bacteriologist for this Survey.

Mr. Corson majored in sanitary chemistry, and as minor subjects took bacteriology and physical chemistry. The thesis which he prepared for his degree was on the "Manganese in Water Supplies."

Leland W. Bennett, '12 is an instructor in the division of Drawing and Design at the University of Pennsylvania. The Freshmen and Sophomores have Engineering Drawing. During the second year the students make sketches of parts of gas, steam engines or steam pumps and then make working detail drawings and tracings from their sketches. The Juniors in Machine Design have Kimball and Bar for a text book, starting with the design and drawing of machine parts, going on through machine frames and structural steel construction. The Seniors have "Machine Design," by Hess for a text book. Each student has a different plan to design and draw in detail.

The Electrical and Mechanical Engineering Departments were recently divided into two parts; having been formerly included under the general head of Mechanical Engineering. Previous to this year, the course in Electrical Engineering given at New Hampshire was superior to that given at the University of Pennsylvania.

P. E. Corriveau 1915 and L. D. Jessemann, B. S., 1914 are to have fellowships at the University of Missouri this coming year. The position of principal of the Jefferson High school which Mr. Jessemann has held this year will be taken by A. O. McCartney, 1915.

W. W. Swett, who won the \$400 scholarships for judging Jerseys at Chicago last year will also be at Missouri.

L. S. Riford, B. S., 1914 occupied a fellowship at this institution last year.

Thomas C. Bailey, '12, has charge of the manual training courses of the grammar schools and high school of Ludlow. Since Mr. Bailey went to Ludlow in the fall of 1912 wonderful improvements have been made in the manual training department. He has increased the equipment continually until his department has come up to the standard to meet the requirements of the State Board of Education. Besides teaching manual training Mr. Bailey is coaching the high school athletics and has succeeded in turning out some fine teams. He has also organized the local Boy Scouts and is the Scout commissioner for that locality.

A daughter, Eloise Margaret, was born to Mr. and Mrs. Frank H. Bills, '10 on May 24. Mr. Bills is an instructor of mathematics at Rhode Island State College, Kingston, R. I.

Stephen DeMeritt, '12, has secured a position with the Stone and Webster Engineering Company of Boston. For the next few months Mr. DeMeritt will be stationed at Bridgeport, Conn.

The engagement of Frances Nudd, '14, and William Krook, '14, was announced recently.

H. R. TUCKER AND J. MORGAN OF THE CLASS OF '12 BUY PLANKS.

The alumni are still buying planks in the new bleachers. The latest purchasers are H. R. Tucker, '12, who bought four, and John Morgan, '12 who bought two.

High class motion pictures and vaudeville at Lyric.

OVER 150 MILLION GALLONS ICE CREAM

This Great Quantity Consumed During 1912 in United States—No Longer Considered a Luxury.

The average consumption of ice cream per capita is more than 6 quarts a year in the United States. In 1912, taking that as a typical year, the sales reached the enormous figure of one hundred and fifty-four millions of gallons. Enormous? Certainly not, if that number were considered attached to bushels of grain, but decidedly so in this particular relation. It must be remembered that only a few years ago ice cream was considered a luxury to be served only on rare and important occasions such as the Fourth of July or a wedding. Ice cream is now considered an indispensable article of food and large quantities are used in hospitals because of its palatability and actual food value.

The composition of ice cream varies considerably. The New Hampshire law requires at least 14 per cent butter fat, while that of Massachusetts requires only half that amount. Fat, however, is not the only valuable constituent of ice cream. With the increased use of condensed milk in its manufacture, the percentage of protein is correspondingly greater, thereby making the product more valuable as a summer food.

The ice cream industry has grown enormously in the last 10 years, and yet it is only in its infancy. It is an industry peculiar to the United States, and the wholesale making of ice cream is practically unknown in any other country.

PROF. W. H. WOLFF WARNS AGAINST KILLING BEES BY SPRAYING.

"Don't kill the bees by spraying fruit trees too soon" is a word of warning by Prof. W. H. Wolff of the department of horticulture, for the orchardists of the state.

The time to spray is when the petals have fallen from the blossoms. This will of course vary with different fruits and in different sections of the state. The petals are falling around Durham now.

To put on the poisonous spray before the petals have fallen is not so effective a measure against the insect pests which infest fruit trees as to spray later, and it is sure death to the bees. It is especially important that bees be preserved in New Hampshire as census reports show that the number of colonies here is decreasing.

The bees fertilize the flowers and produce the fruit and some fruits depend on insect fertilization entirely. To kill the bees then is to kill the fruit.

THE BETTER WAY

A worthy acknowledgment of the better way to do dairy cleaning is found in the recognition given

by Dairy Colleges and Dairy Authorities.

Almost to the man, State Dairy Authorities and Inspectors advise the use of this special dairy cleaner.

The better way, made possible by the sanitary cleaning ingredients of Wyandotte Dairyman's Cleaner and Cleanser, meets the approval of 85 percent of all butter and cheesemakers. Hundreds of dairymen, milk dealers, and creamery patrons likewise approve of the better way for they too, depend upon "Wyandotte" for their dairy cleanliness.

If you are not acquainted with the better way, why not ask your Indian Circle dealer or write your supply man for Wyandotte Dairyman's Cleaner and Cleanser. They will gladly supply you with the understanding that it will prove to be all that is claimed for it. Otherwise the trial will cost you nothing.

VERMONT 62—N. H. 55
Concluded from Page 1.

5' 11". 5' 7" sufficed to win first place for him, however, and Pettee and Wilcox tied for second.

Ward easily won the quarter in 55 seconds flat.

In the broad jump New Hampshire only had two men entered, one of whom had never before tried that event, and was able to get only one point.

HAMMER THROW

The hammer-throw was closely contested for first place, Huse being forced to better his own record by five feet in order to nose out his opponent by the small margin of three feet.

The 220 yd. dash was won by Ward who smashed the record in doing so. It was in this race which came near the end of the program that Ross showed his grit. Although he had pulled a tendon the first of the afternoon, he entered this race as there was no other man to go into it. Hardly able to stand he managed to hold his own pretty well but could not get more than fourth place.

The Summary:

100 yd dash—Won by Ward, N. H.; 2nd Bolster, Vt.; 3rd Ross, N. H.; time 10 1-5 sec. (Record).

220 yd dash—Won by Ward, N. H.; 2nd Bolster, Vt.; 3rd Spencer, Vt. time 22 3-5 sec. (Record)

440 yd dash—Won by Ward, N. H.; 2nd Patterson, Vt.; 3rd Bolster, Vt.; time 55 sec.

880 yd. dash—Won by Wentworth, N. H.; 2nd LeBaron, Vt.; 3rd Wilber, Vt. Time 2 min. 7 sec. (Record)

Mile run—Won by Shippy, Vt.; 2nd Whittemore, N. H.; 3rd Eastman, N. H. Time 4 min. 46 3-5 sec.

2 mile run—Won by Hayden, Vt.; 2nd Whittemore, N. H.; 3rd Shippy, Vt. Time 10 min. 23 2-5 sec.

120 yd hurdles—Won by R. W. Smith, Vt.; 2nd Groves, N. H.; 3rd Hackett, Vt. Time 16 4-5 sec.

220 yd. hurdles—Won by Gallagher, Vt.; 2nd Groves, N. H.; 3rd R. W. Smith Vt. Time 26 2-5 sec.

Pole Vault—Won by Brill, N. H.; 2nd Burrage, Vt.; 3rd Hurd, N. H.; height 10 feet 8 inches. (Equals record)

Shot Put—Won by Bugbee, N. H.; 2nd Ames, Vt.; 3rd Brill, N. H. Distance 35 feet 10 1-2 inches. (Record)

High Jump—Won by R. W. Smith, Vt.; 2nd Pettee, N. H., and Wilcox, Vt. tied. Height 5 feet 7 inches.

Broad Jump—Won by R. W. Smith, Vt.; 2nd Gallagher, Vt.; 3rd Bugbee, N. H. Distance 20 feet 8 3-4 inches.

Hammer Throw—Won by Huse, N. H.; 2nd Burrage, Vt.; 3rd Bugbee, N. H. Distance 116 feet 8 3-4 inches. (Record)

A week ago last Monday the class in ice cream making went on an instruction trip to the plant of the Jersey Ice Cream Co., Lawrence, Mass. This company has one of the largest plants in New England. It is provided with the mechanical refrigerating system and has a capacity of two thousand gallons of ice cream per day.

EXPERIMENTATION UNDER WAY WITH INOCULATION OF SOY BEAMS.

The growing of soy beans is becoming of more and more interest and importance thruout New Hampshire, tho some failures have been reported. In order to find out whether these failures are due to lack of inoculation, the agronomy department is carrying on experiments with six test plots of the Yellow soy bean, using different inoculating media. Cultures to be used come from the United States Department of Agriculture at Washington, from the "Nitragin" Co., Milwaukee, the "Farmogerm" Co., of Bloomfield, M. J., K. K. Mulford Co., and from the "Inoculin" Co., of Milwaukee. One plot will not be inoculated, so as to form a check on the experiment.

MRS. THOMAS LATON ENTERTAINS PI ALPHA PHI SORORITY.

Mrs. Thomas Laton entertained the Pi Alpha Phi Sorority, last Friday, at her home in Madbury. The girls left Durham on the 2.22 train in the afternoon and were met by their hostess who had provided various diversions for the afternoon's entertainment. At six o'clock a most appetizing banquet was served and the remainder of the evening was spent in a very enjoyable manner.

ANNOUNCEMENT OF ENGAGEMENT OF MARION GRACE DUDLEY '16.

Mr. and Mrs. George A. Dudley of Lee, N. H., have announced the engagement of their daughter, Marion Grace, to Theodore Francis Cram, 2 yr. '15, of Greenwood, Mass.

Sheep Thrive Better

(206)

While it is true that no known treatment or remedy will dislodge all the different kinds of worms that infest sheep, it is nevertheless true that SAL-VET will keep sheep in condition to thrive better, and saves hundreds that would otherwise succumb to the multiplying hordes of stomach and intestinal worms.

Mr. J. H. Lest, of Chas. Lest & Sons, Mantua, Ohio, writes: "We consider SAL-VET the salvation of the sheep in America, and we recommend its constant use to our customers, as well as to others."

Mr. Henry L. Wardwell, Springfield Center, N. Y., says of SAL-VET: "We have used SAL-VET as a preventive of worms in our flock of sheep, and have great faith in it. We keep it before them all the time, both when on pasture and when in the barn."

The Great
Worm
Destroyer

SAL-VET

The Great
Live Stock
Conditioner

is highly endorsed by nearly all sheep breeders and by thousands of general farmers and stock raisers. I guarantee SAL-VET to stop your losses from stomach and free intestinal worms or no pay—I take all the risk—let you feed it 60 days to prove my claims. You cannot afford to pass this offer by if you own or feed stock with the intention of making a profit from them.

**Just Fill Out
the Coupon**

Tell me how many head of stock you have and I'll ship you enough SAL-VET—no money down—to feed your stock for 60 days. Simply pay the freight charges on arrival—feed the SAL-VET as directed. If it does not do all I claim I'll cancel the charge, and you won't owe me one cent.
